### **Explore Your Lake on the Lake and on the Land**

From the impact of earthquakes and glaciers to the impact of storm water runoff and invasive species, the LGA's Floating Classroom will take you on a journey from the formation of Lake George to the effects of the colonization of its shores.

The Floating Classroom consists of two parts: A two-hour trip on the beautiful water of Lake George sampling water quality. The other half takes place at the Lake George Recreation Center where participants will venture to the Lake George Recreation Center where they will look at how various aspects of the land can affect water quality, from soil types to human influence.

*The Great Loop , also called the American Loop or the Great Circle, is a long distance circumnavigation voyage that encompasses the entire eastern portion of the United States and parts of Canada, from the Atlantic Coast to the heartland rivers to the Gulf of Mexico depending on the route taken, the Great Loop may be from 5,000 to 7,500 miles long and is primarily in sheltered waters, making it one of the safest long distance cruises in the world. This voyage is undertaken by many avid sailors and cruisers, and as more people take up hobbies such as boating and sailing, the various routes for the Great Loop are becoming ever more popular.*
